

## PE JAW CRUSHER PE颞式破碎机

### 设备简介 Introduction

PE颞式破碎机主要用于对各种矿石与大块物料的中等粒度破碎，也可用于生产路基所需石料以及建筑用的石子骨料。颞式破碎机广泛运用于矿山、冶金、建材、公路、铁路、水利和化工等行业，被破碎物料的最高抗压强度为320Mpa。

The PE jaw crusher is mainly used for medium-size crushing of various ores and bulk materials, as well as stone materials for roadbed construction and stone aggregates for construction. Jaw crushers are widely used in mining, metallurgy, building materials, roads, railways, water conservancy and chemical industries. The highest compressive strength of crushed materials is 320Mpa.

### 产品特点

#### Features

1. 深腔颞破，破碎比大；
  2. 易损件寿命长，耐磨；
  3. 节能环保，粉尘少，噪音小；
  4. 制造工艺精密，对于主轴、易损件、轴承之类的核心部件采用了热处理工艺；
  5. 大型颞破严格使用焊接架，保证产品使用可靠；
  6. 产品都有吊装钩，方便吊装。
1. The deep cavity is broken and the crushing ratio is large;
  2. The wearing parts have long service life and wear resistance;
  3. Energy saving and environmental protection, less dust and less noise;
  4. The manufacturing process is precise, and a heat treatment process is adopted for core components such as spindles, wearing parts and bearings;
  5. Large-scale smashing and strict use of welding frame to ensure reliable use of products;
  6. The product has lifting hooks for easy lifting.

### 产品参数

#### Main Specification

| 型号<br>Model  | 进料口尺寸<br>Feed Opening (mm) | 最大进料粒度<br>Max Feed Size (mm) | 排料口调整范围<br>Discharge Opening Range (mm) | 处理能力<br>Productive Capacity(t/h) | 偏心轴转速<br>Eccentric Shaft Speed (r/min) | 电机功率<br>Electric Power (kw) | 重量<br>Weight (t) | 外形尺寸<br>Overall Dimensions (mm) |
